Art Unit: 3743

Claims 6, 7, and 9-20 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-5, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith, Jr. in view of Thery et al.

Please see the comments made in regard to the above rejection in the previous Office action. Regarding claims 21 and 22, the examiner takes official notice that spraying and immersion are both notoriously well known means of applying liquids to surfaces for treatment. ***In re Malcolm et al.*, 54 U.S.P.Q. 235.**

Applicant's arguments filed June 19, 2002 have been fully considered but they are not persuasive.

As indicated in the previous Office action, the disclosed heat exchanger of Smith, Jr. reads on the claimed invention. The opposite sides of the web 68 disposed between the pipe read on the now claimed "inner surface" and "outer surface" of a heat exchanger just as readily as they read on the previously claimed (claim 8) "first" and "second" surfaces. Absent a positive recitation of a tubular or other enclosing structure defining the claimed surfaces, the

Art Unit: 3743

recitations of "inner" and "outer" are merely nominal, and do not limit the claimed structure in a way which distinguishes over Smith, Jr.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujimoto et al. discloses a heat transfer enclosure for a circuit board having inside and outside surfaces treated with a high emissivity treatment. Campbell et al. shows a tubular member in an infrared heater apparatus (outer tube) with inner and outer surfaces provided with highly absorptive/emissive coatings. Fannon et al. shows a similar tube in which coolant may be supplied therethrough.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
